PRL’s ALUMINUM MAX SLIDER

The **Max Slider Aluminum** & Glass Door System is engineered to create expansive openings that seamlessly connect interior and exterior spaces. Designed for both residential and commercial applications, this high-performance sliding system combines strength, elegance, and versatility.

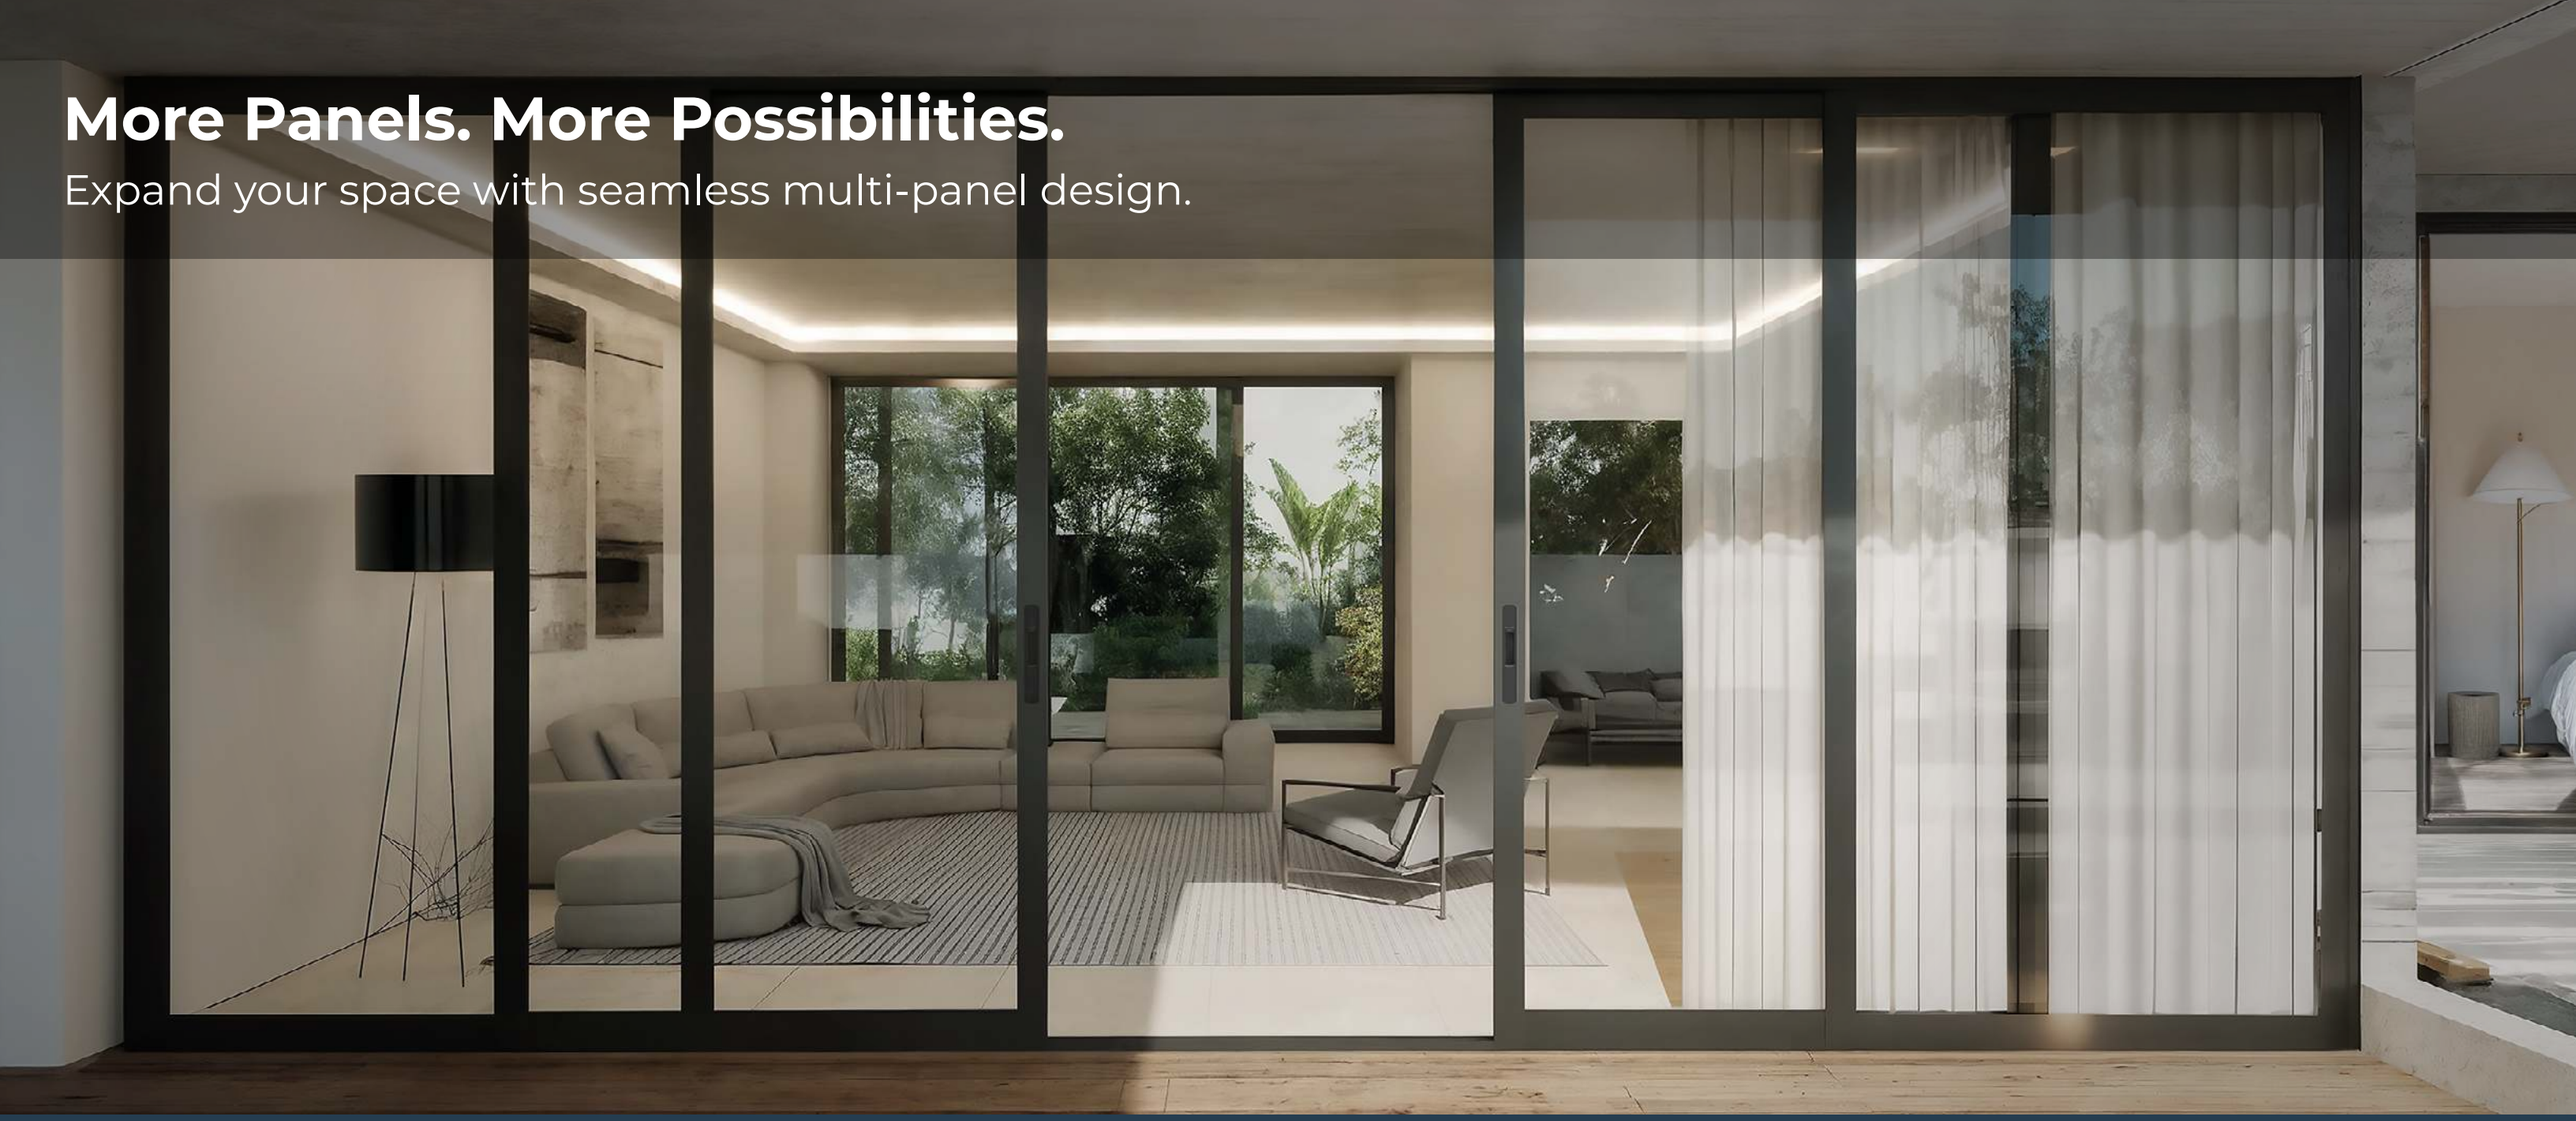

Its slim aluminum profiles maximize natural light and views, while advanced engineering provides outstanding weather resistance, energy efficiency, and sound control.

With multiple configurations and the ability to accommodate large openings and maximum heights, the Max Slider is an ideal solution for modern architectural spaces.

More Panels. More Possibilities.

Expand your space with seamless multi-panel design.

The Max Slider offers a **highly adaptable** sliding door system designed for ***large openings*** and demanding architectural applications.
Excellent weather resistance, *energy efficiency*, and sound control.
Multiple configuration options including pocket, multi-slide, stacking, and 90-degree corner systems, allow architects and designers to create **flexible** indoor/outdoor spaces.

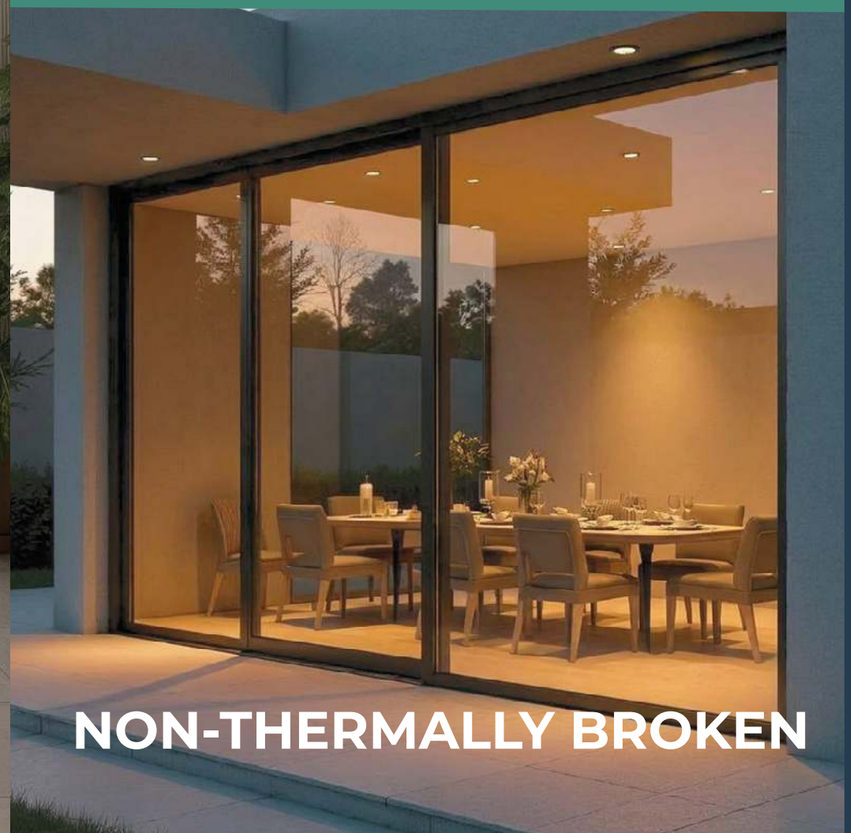

Exceptional **Performance**.
Limitless views.
One sliding system.

Enjoy Your Space in Any Climate

Comfort and performance, all year round.

THERMALLY BROKEN

NON-THERMALLY BROKEN

RESIDENTIAL & COMMERCIAL

Indoor/outdoor sliding aluminum door

HIGH-LEVEL PERFORMANCE

Is designed and tested for hurricane resistance in a laboratory under controlled environmental conditions.

DIFERENT OPTIONS

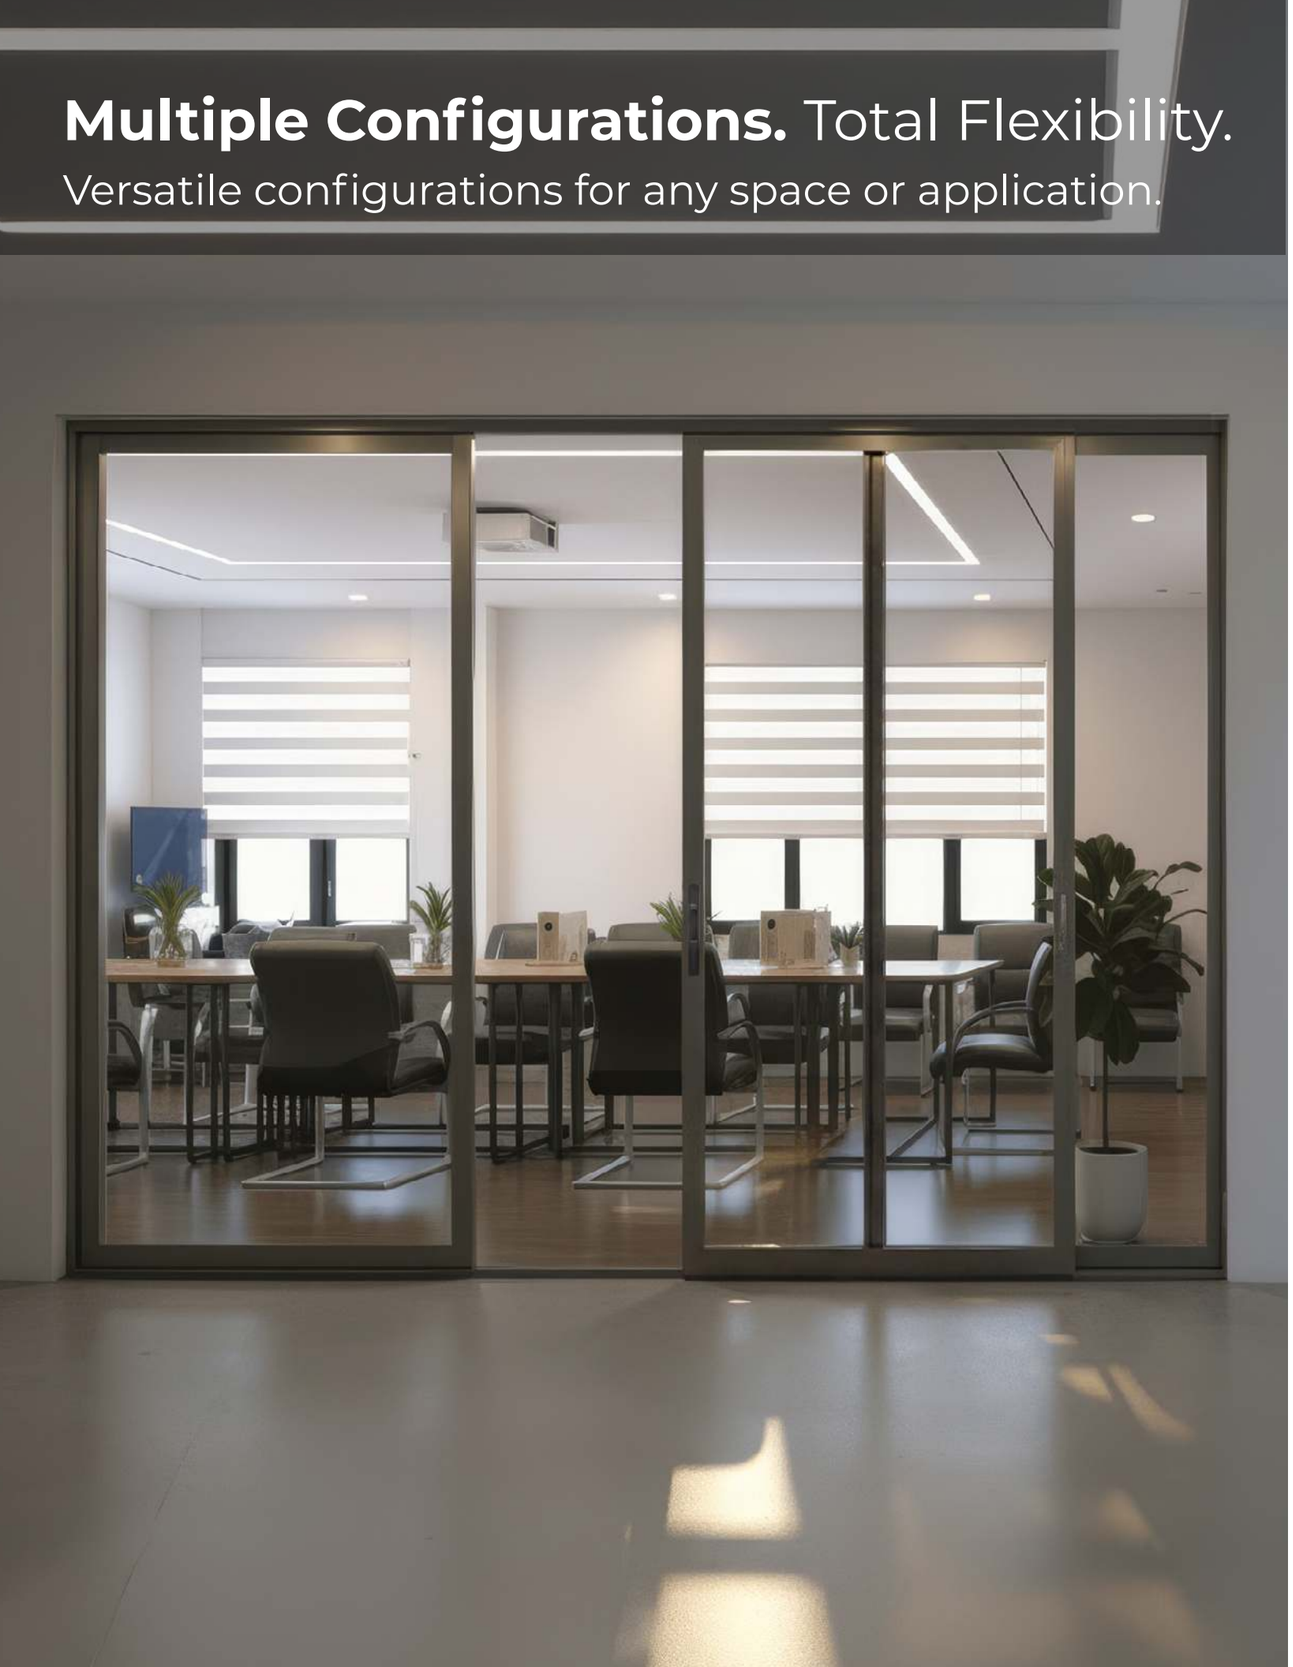

Available in top-hung or bottom-rolling systems with 3”, 4”, and ultra-narrow 1” stiles, ensuring smooth functionality.

MULTIPLE CONFIGURATIONS

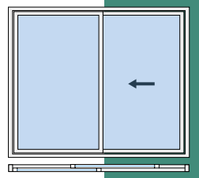

They can consist of multiple panels that slide in different directions, further opening up the space.

Multiple Configurations. Total Flexibility.

Versatile configurations for any space or application.

Maximum *Opening* Flexibility

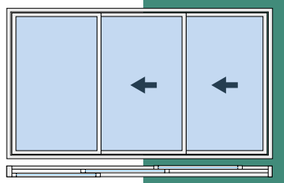

WALL SYSTEM

Our one-way single door system is our standard configuration. It has a fix panel and a door, perfect for a patio or entry way adaptable to limited space requirements.

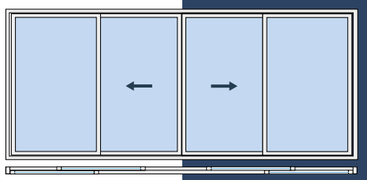

POCKET SYSTEM

Pocket system is the Max' sliders basic configuration as a one way slider. Hidden application requires designer to consider wall space requirements or the use of an optional custom offset surface mount bracket system for interior applications.

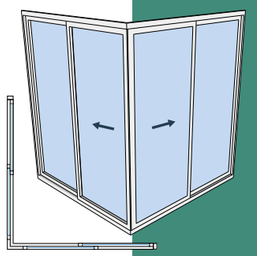

MULTI-TRACK SYSTEM

In addition to the standard Max' slider features, it also offers a one piece vertical interlock system, that allows sliding multiple panels at one time. All the panels opens up to one side, like a movable wall creating an entry way to connect the indoor and outdoors living areas. Its the perfect solution

BIPASS SYSTEM

Bipass configuration maximizes the features of the stacking concept as two way, multiple track or panel system with unlimited applications. This configuration offers both standard and special features.

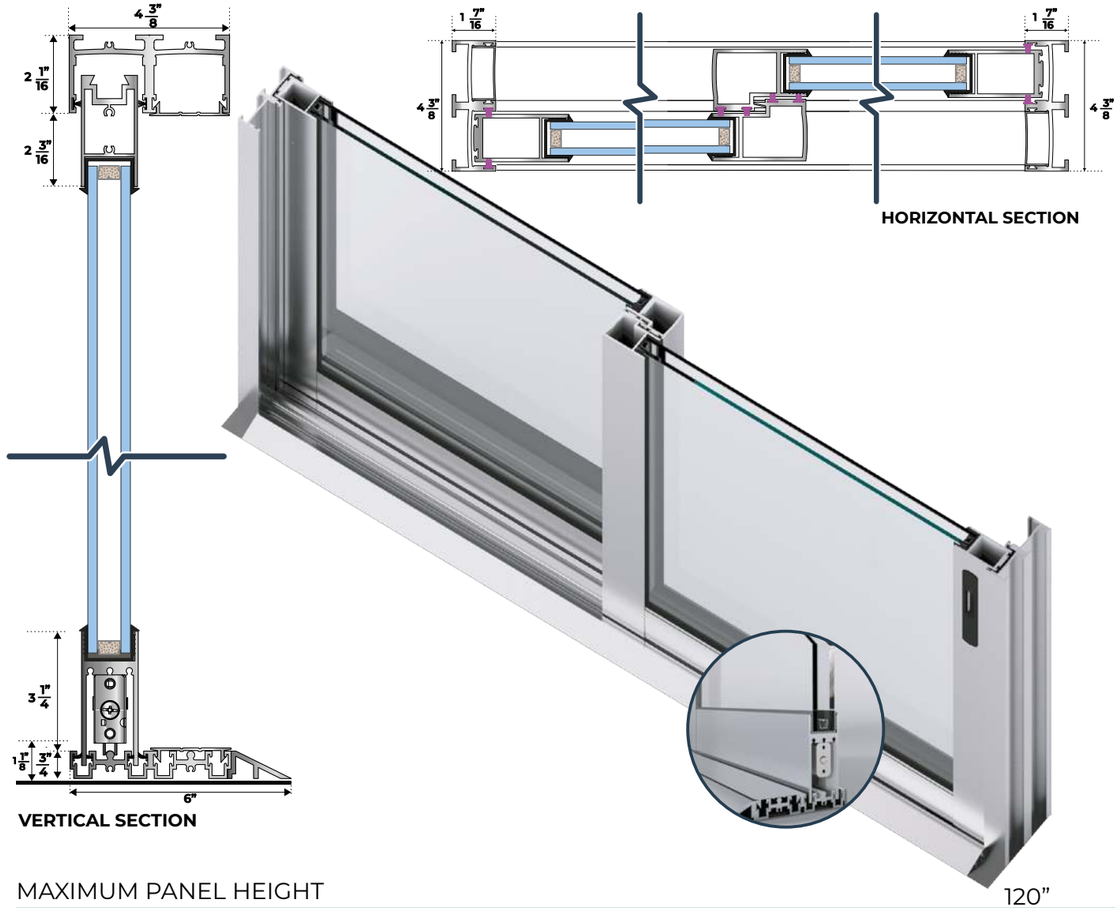

90 DEGREE SYSTEM

90-Degree angular slider configuration are offered for undisrupted functionality and full extent views. The slider system can either be two-panel or multi-panel making angular bipartition configuration.

90° Configuration

Open Corners. Limitless Views.

The **90-Degree** slider system can either be ***two panel*** or multipanel making angular bipartition configuration.

Pocket System

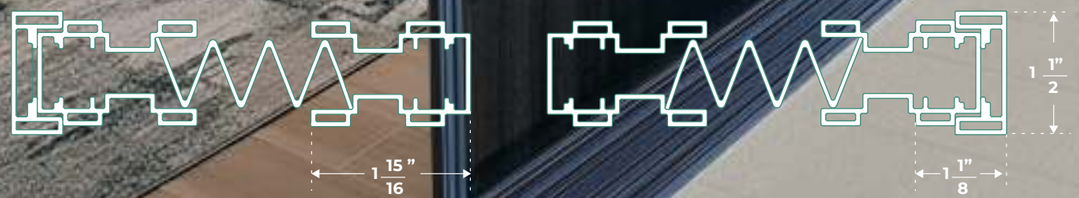

Fully Hidden. Fully Open.

The **pocket system** allows glass panels to slide fully **into** a concealed ***wall recess***, **completely clearing** the opening and creating a **seamless** transition with panels **hidden** from view.

Retractable Screen

Invisible Comfort, Everyday Living

Automated System

Smart Movement for Modern Spaces

Prl's Max Slider can be equipped with an ***automation system*** that allows the *door to open and close* through an **electric motor**, providing enhanced **comfort**, **convenience**, and **smooth** ***operation***.

New **Flush** Handle

Seamless Design. Effortless Function.

- Adjustable back-set from 3/4” - 1 1/2”
- Unique linear drive plate reduces operating force
- Available in powder coat and architectural finishes
- Available in keyed or non-keyed options
- One piece design reduces required milling

Engineered for versatility. The first flush handle to feature an adjustable back-set, ensuring a precision fit.

New **Smart** Lock

Unlock the Future of Security

Smart Lock redefines sliding door security with five seamless access methods, remote mobile control, and durable zinc construction.

- Multiple Unlocking methods
- Remote unlocking
- Fingerprint, Passcode, Key, Card, Bluetooth, App
- Designed for slim aluminum doors
- IPX5 Waterproof Standard

ON

- Easy adaptation to any control system: home automation, iPhone, iPad, motion sensor, remote control.
- Fast reaction less than a second
- Replaces the use of curtains or blinds
- Environmentally friendly, low energy consumption

Laminated Glass
Structural Integrity, Safety & Anti-Intrusion Glazing

PDLC
(Polymer Dispersed Liquid Crystal)

Is a **material** that allows spaces with ***transparent*** glass to become **private areas.**

Manufactured **in-house** with ***advanced*** **European** technology.

Acoustic Insulation

Thermal Insulation
Increased U-Value

By applying an ***electrical*** current, the molecules inside the *liquid crystal* align so that **light** can travel **through it.**
With the power ***off,*** the molecules distribute *randomly inside* the glass to provide **instant privacy**.

PRL ALUMINUM

PRL delivers high-performance, custom-built glass and aluminum solutions designed, engineered, and manufactured in-house for unmatched quality and precision.

Introducing PRL's new aluminum product line. We offer a refined collection of architectural systems that expands design possibilities across commercial and residential projects.
With decades of expertise and a commitment to innovation, PRL's your partner in creating bold, seamless architectural spaces.

STOREFRONT

THERMALLY BROKEN

PRL's thermally broken storefront systems are becoming a preferred choice for commercial projects due to their superior thermal insulation and energy efficiency. These systems help regulate indoor temperatures by reducing heat transfer, creating a more comfortable and energy-efficient environment.

BATTLE DOOR

THERMALLY BROKEN

PRL's Battle door is a high-performance aluminum door system engineered to withstand extreme conditions without compromising on design. Whether facing hurricanes, high-impact environments, or urban security threats, our battle door offers the durability and structural integrity demanded by today's architectural, commercial, and residential projects.

MAX WINDOW

THERMALLY BROKEN

Max Window system delivers thermally broken profiles with an elegant and slim sightline and concealed hardware. Perfectly balancing installer-friendly efficiency with exceptional overall performance.

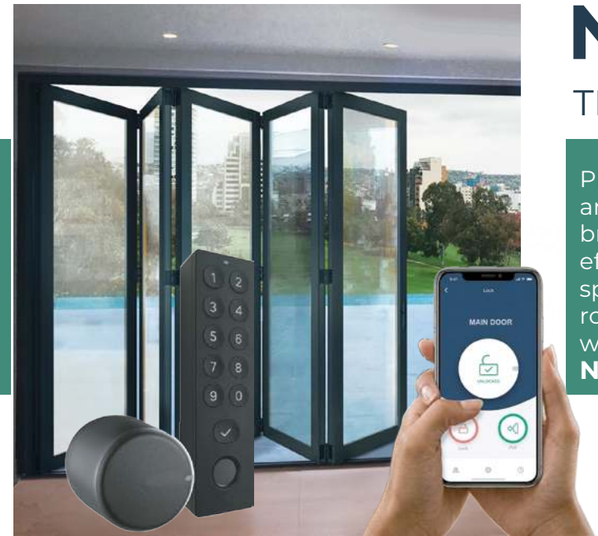

SUNNY LUX DOOR

THERMALLY BROKEN

Designed to elevate any space with a contemporary look and outstanding durability, our Sunny Lux aluminum door features ultra-slim lines and a fully mitered frame.

Our Sunny Lux door combines a minimalist design, high performance and advanced security for both residential and commercial applications.

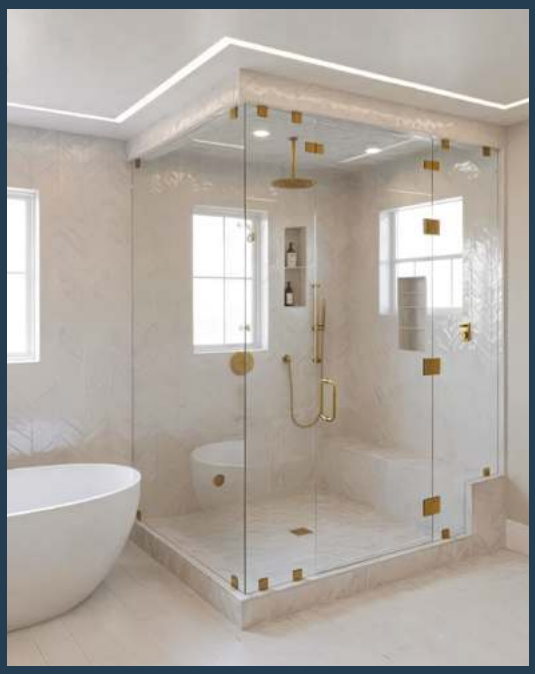

NEW BI-FOLD

THERMALLY BROKEN

PRL's New Bi-Fold, designed for commercial and residential applications, is a thermally broken bottom rolling folding door that effortlessly connects indoor and outdoor spaces. With its slim sightlines and concealed rollers, it exudes a sophisticated aesthetic, whether in an open or closed position.
Now available with the new Smart Lock.

GLASS SOLUTIONS

CUSTOM FRAMELESS SHOWER DOORS

ALL- GLASS DOORS

BULLET RESISTANT GLASS

HANDRAIL SYSTEMS

PRL Glass & Aluminum is a leading manufacturer of architectural glass and aluminum systems trusted by professionals across the U.S. for high-performance, custom-built solutions.

From sliding doors and curtainwalls to shower glass doors, aluminum doors and complete storefront systems, we design, engineer, and manufacture everything in-house to ensure quality, speed, durability and precision.

Our fully integrated approach allows us to deliver tailored solutions for commercial, residential, and hospitality projects — all crafted to meet your vision and elevate your architectural design.

Backed by decades of expertise and a commitment to innovation, PRL's your partner in building bold, seamless spaces with glass and aluminum at the core.
